

Television / Audio Visual

- **Saves energy and money**
- **Energy Saving Trust Recommended**
- **Powers all TV and Audio Visual equipment ON or OFF automatically**
- **Dedicated Permanent On Sockets to power recording devices or similar items with timers.**
- **Helps to increase the lifespan of your equipment**
- **Provides high quality surge protection for your whole system**
- **Reduces fire risk**
- **British Standards compliant**

Sensor learns your remote signal

Eliminating standby

Eliminating standby in our homes is not always easy. Those little red lights on your television and home entertainment additions such as surround sound amplifiers, DVD Players and computer consoles are needlessly costing you money every hour. Research suggests that leaving electrical equipment on standby can reduce equipment lifespan by an average of 15% and creates a needless fire risk. OneClick Technologies have spent several years developing the world's first patented intelligent panel designed to work automatically and boasts a lifespan of at least 15 years. Tested to British Standards, RoHS compliant and recommended by the Energy Saving Trust, the IntelliPanel's green credentials, integrity and reliability are endorsed by independently qualified technicians.

Say goodbye to standby.

Instead of simply switching off the television the clever IntelliPanel continues to record the amount of power being drawn by the television and waits until the internal circuitry has completely powered down into a standby state, only then does the IntelliPanel switch the television and peripheral equipment off. Switching the television power off immediately (as if pulling the plug from the mains) can cause corruption of the internal software in some digital televisions. This can result in the television having to go through a re-boot process.

How Does It Work?

The TVAIMP206 IntelliPanel learns to recognise the signal from your television remote control; this enables it to activate your television automatically into standby mode whenever you are ready to use it. When you have finished using your television you switch it off in the normal way using your remote control and the IntelliPanel does the rest!

No more standby – no more wasted power.

To date OneClick have sold almost 1 million products and we estimate that together we've saved approximately 50 million kilograms of Carbon Dioxide emissions.

Television / Audio Visual

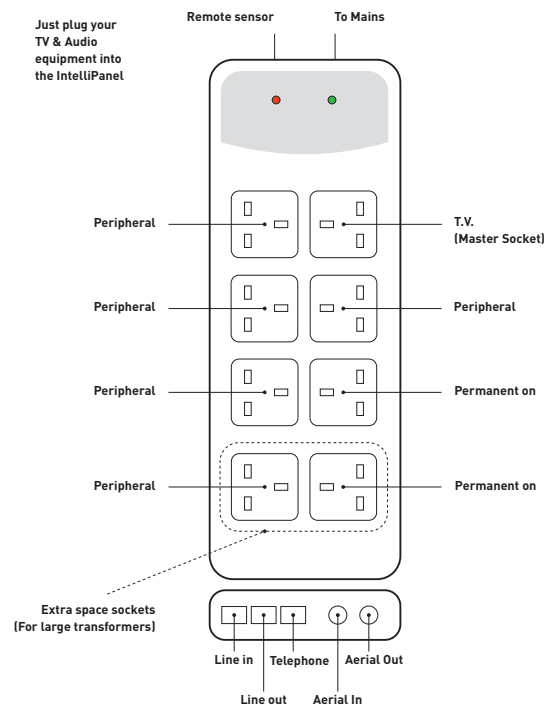

Say goodbye to standby.

Specification: TVAIMP206

- **Auto Calibration** - The IntelliPanel continuously measures the amount of electricity being consumed by your TV in active and standby mode, by learning your televisions unique energy pattern the IntelliPanel will only power your peripherals on/off when appropriate - at the right time, every time.
- **Zero-Crossing Detection** - Automatically determines when the power supplied to the peripherals is at an optimum level for creating the least amount of stress to components.
- **Quality Surge Protection** - will dissipate surges of up to 1225 joules of energy/a peak current of 42,000 amps and includes a thermal fuse in case of a catastrophic spike
- **Permanent On Sockets** - These sockets are designed for items which require permanent power such as video recorders, Sky TV or digital TV boxes with built in Personal Video Recorder.
- **Telephone/Aerial Surge Protection** - High quality varistors give the best possible protection against surge.
- **Telephone splitter** - one input line split into two, one for a telephone and one for another application such as a Sky Digibox.
- Lowest standby power of approx 0.5 watts.

- Saves an average 35 watts per hour depending on the number of connected peripherals. This product can pay for itself in less than a year of use.
- Fast reaction time.
- Total Maximum Current 13 amps.
- Power cable length 2 Metres.
- Telephone cable length 2 Metres.
- Aerial cable length 2 Metres.
- 2 wall or desk mount lugs on the rear of the panel.
- Low energy green neon indicates when the Master Socket is active and surge protection is functioning.
- Low energy red neon indicates when the peripheral sockets are on.
- British Standards and RoHS Compliant.
- Warranted for 1 year against faulty workmanship. Your statutory rights are not affected.
